Recommended dilutions: WB: 1:2,000-5,000 IHC: 1:100-500

Specificity: The antibody reacts with the Fc portion of mouse IgG2c heavy chain but not with other mouse IgG subclasses, mouse IgM, or the Fab portion of mouse immunoglobulins. The antibody minimal cross-reaction with **bovine, horse, human** serum proteins, but it may cross-react with immunoglobulins from other species.

Note: **Avoid use of Sodium azide as a preservative, it will substantially inhibit the enzyme activity of HRP.**
